

**Futures Sport + Entertainment is a leading research and consulting agency in the sports industry, with offices in London, New York and Sydney.**

We work with the foremost domestic and international **sports leagues, teams,** and **sponsors,** advising on how they should optimise their investments for increased return. We deliver exceptional client servicing and provide unrivalled **commercial insights** by listening carefully to our clients' needs.

We are looking for a **Graduate Analyst** to join our **London** office. You will work across our leading clients, with a focus on media and sponsorship analytics. This role will be highly challenging, requiring you to demonstrate your analytical skills, creativity in displaying insights in client reports, and ability to work effectively as part of a team.

We feel strongly about **developing our talent** and have a great record of employees progressing within the company. Progression is supported through structured training as well as both formal and informal support from the team. We offer regular team days, hybrid working, and a great benefits scheme. You'll be joining a thriving **graduate programme** with opportunities for training and sports event experiences.

### Key Responsibilities

- Managing, analysing and interpreting **complex datasets**
- Interpreting data to deliver bespoke **commercial insight** to our clients
- Contributing to writing and preparing client **reports and presentations**
- Immersing yourself in the **world of sport, data and business** to add value to the team and our clients
- From day one, you will gain exposure to senior members of the team and high profile clients to deliver solutions and help in the development of our **research software and tools**

### What We Are Looking For

- **Graduate** or **final year student** graduating this year. Have achieved, or on target to achieve, a strong grade in subjects with a significant degree of **data analysis** (such as computer science, engineering, mathematics, and economics)
- A keen interest in **sport and entertainment,** with a desire to learn more about its commercial landscape
- An **analytical and strategic thinker** who has a business mind
- Excellent **numeric** and **communication** skills, including advanced Excel and PowerPoint
- Experience with **coding and data science software** desirable e.g. SQL, VBA, R, SPSS, Python

**Interested? Then send a CV and cover letter to [jobs@futuresport.com](mailto:jobs@futuresport.com) and answer the following questions:**

- Why Futures?
- What are your relevant skills and interests?
- Why should we progress your application over and above your peers?
